Shedaker's Pedigreed Mary Washington

THE BEST HIGH PRODUCING, TENDER, GREEN ASPARAGUS FOR MARKET AND HOME USE

There is no variety of asparagus as good as the Washington and no strain of the Washington near as good as the "Mary."

The Washington stock is all descended from the male Washington and most of the seeds and roots of this variety now available commercially are descended from the female Martha and other unnamed females. The female "Mary," however, like the male Washington, is the greatest find in the history of asparagus breeding. There is no other progeny descended from the male plant Washington that compares with the "Mary."

It is earlier, produces more, has larger stalks, possesses higher rust resistance and will net a great deal more money per acre.

"Mary" is recognized as the best and we are pleased to announce that we can now offer you selected roots grown from the seed of this superior asparagus, produced from a fine field of second generation Mary Washington.

The very recent descent from the Washington male and "Mary" female places an extremely high value upon our stock of roots, the importance of which should not be overlooked by any one desiring the best.

"'Mary' is so much better you can see the difference."
